

**Third Global Symposium
on Health Systems Research**
Science and practice of people-centered health systems

Equity in the context of universal health coverage: the launch of a research series

**Thursday 2 October
8.15-9.15am
Room 1.63-1.64**

SAVE THE DATE

Please join us for breakfast as we launch a series of new UNICEF working papers applying both qualitative and quantitative analyses to health service issues of access and uptake in Ghana, Rwanda, Bangladesh and Vietnam. These papers build an evidence-base for a mixed-methods approach in the evaluation of non-financial access barriers to maternal, newborn and child health. We invite policy makers, researchers, civil servants, international organisations and other interested stakeholders to engage in discussion around a more inclusive and equitable path to Universal Health Coverage.
